

Greenstone: Open source software for building digital library collections

Ian H. Witten
Computer Science Department
Waikato University
New Zealand
<http://greenstone.org>
<http://nzdl.org>

Agenda

Overview
What does Greenstone do?
Greenstone facts; standards
Reader's Interface: examples of collections

Librarian interface
Build a collection in 30 sec (Hobbits)
Build a multimedia collection (Beatles)
Adding and using metadata
Browsing classifiers, search indexes
Building a collection manually (for masochists only)

Advanced stuff
Under the hood: collection configuration file
Customizing with macros
Personalizing your home page
Different interface languages
Examples of what others have done

Reaching out
Serving and acquiring OAI
DSpace and METS
Greenstone3

What we wanted

Greenstone turns a ragtag menagerie of documents in various formats into an easy-to-use collection that can run on a standalone laptop in a Ugandan village's information center

ALA 2002

What we wanted

- ❖ "Collections" of digital material
- ❖ Individualized, depending on metadata etc
- ❖ Up to several Gb of text ...
- ❖ ... + associated images, movies, whatever
- ❖ Fully searchable
- ❖ Served on WWW, or published on removable media
- ❖ Run anywhere, on any computer
- ❖ Fully internationalized
- ❖ Non-exclusive: documents and metadata in any format
- ❖ Non-prescriptive: standard and non-standard metadata

What we got: Greenstone

Access

- ❖ Accessible via any Web browser
- ❖ Server runs on anything (all Windows + Unix + Mac)
- ❖ Collections can be published on CD-ROM/DVD
- ❖ Trivial to install
- ❖ GUI interface for building and publishing collections

Searching/ browsing

- ❖ Collection-specific
- ❖ Full-text and fielded search
- ❖ Flexible browsing facilities
- ❖ Metadata-based (Dublin Core recommended)
- ❖ Creates all access structures automatically

Extensible

- ❖ Plugins — new document, metadata formats
- ❖ Classifiers — new metadata browsers

Multi-*

- ❖ Multilingual: Documents *and* interfaces
- ❖ Multimedia: image, video, audio collections exist
- ❖ Multiformat: Documents *and* metadata

UNESCO: Distributing Greenstone DL software

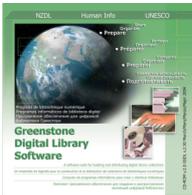

Sustainable development

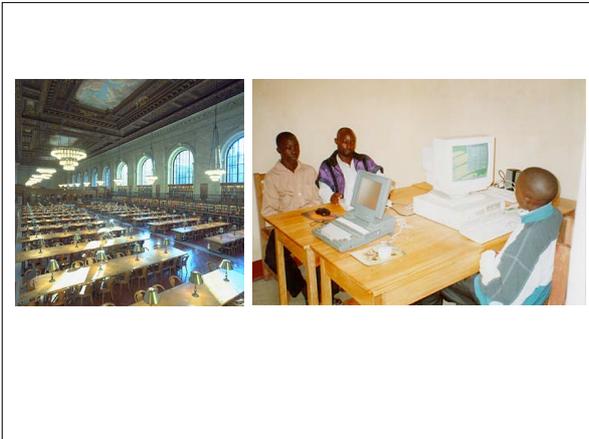

*"Give a man a fish, feed him for a day
Teach a man to fish, feed him for life"*

Greenstone software on CD-ROM

- ❖ GNU licensed
- ❖ Fully documented ... in English/French/Spanish/Russian
- ❖ Language interfaces ... Arabic Chinese Czech ... Thai Turkish
- ❖ Unix/Windows/Mac OS-X
- ❖ Trivial to install
- ❖ GUI interface for gathering, enriching, building ...
- ❖ Serve collections on Web or write them to CD-ROM
- ❖ Document formats: HTML, Word, PDF, PS, plain text, e-mail
- ❖ Metadata formats: XML, DC, OAI, MARC, ...

download from <http://greenstone.org>

Greenstone facts

- Distribution**
 - ❖ Open source: Gnu GPL
 - ❖ Distributed via SourceForge since: Nov 2000
 - ❖ Average downloads: 5000/month since: Nov 2000
 - ❖ Humanitarian CD-ROMs produced: 30
 - ❖ Distribution for each one: 5000/year
- International**
 - ❖ Languages for interface: 38
 - ❖ Languages for full software + manual: 10
 - ❖ Countries represented on email lists: 6
 - ❖ UNESCO training courses in:
 - Bangalore, Almaty, Dakar, Suva, ...
- UN Agencies**
 - ❖ UNESCO, Paris ("Information for All")
 - ❖ FAO, Rome (Info Management Resources)
 - ❖ UNU, Japan (CD-ROM collections of UN)
- Technical centers**
 - ❖ University of Waikato, New Zealand
 - ❖ Indian Institute of Sciences, Bangalore
 - ❖ University College, London
 - ❖ University of Cape Town, South Africa
 - ❖ University of Lethbridge, Canada

Sample collections at greenstone.org

- International**
 - Argentina Human Rights Commission
 - Tasmania State Library
 - Peking University Digital Library
 - Gresham College, London
 - University of Applied Sciences, Stuttgart
 - Association of Indian Labour Historians, Delhi
 - Indian Institute of Management, Kozhikode
 - Indian Institute of Science, Bangalore
 - Vimercate Public Library, Milan, Italy
 - Netherlands Institute for Scientific Information Services
 - Philippine Government Information Network
 - Mari El Republic, Russia
 - Slavonski Brod Public Library, Slovenia
 - Vietnam National University
 - Welsh Books Council
- U.S.**
 - Auburn University, Alabama
 - Detroit Public Library
 - Hawaiian Electronic Library
 - ibiblio project, University of North Carolina
 - Illinois Wesleyan University
 - LeHigh University, Pennsylvania
 - New York Botanical Garden
 - University of California at Riverside
 - University of Chicago Library
 - University of Illinois
 - Texas A&M University
 - Washington Research Library Consortium

Standards

- Metadata**
 - ❖ Can use any metadata set, Dublin Core supplied
 - ❖ Plugins for

XML	Refer
MARC	OAI
CDS/ISIS	METS
ProCite	DSpace
BibTex	
 - ❖ METS can be used as Greenstone's internal representation
- Serving**
 - ❖ Web
 - ❖ Can publish Greenstone collections on CD-ROM
 - ❖ Can publish Greenstone collections on OAI
 - ❖ Export collections to METS
 - ❖ Export collections to DSpace (*ready for DSpace's batch import program*)
- Documents**
 - ❖ Plugins for

PDF	ZIP	Images
PostScript	Excel	(any format: GIF, JPEG, TIFF ...)
Word, RTF	PPT	MP3
HTML	Email	Ogg Vorbis
Plain text	Source code	UnknownPlug
Latex	RealMedia	(e.g. for audio, MPEG, Midi)

What is open-source software?

- ❖ "The **basic idea behind open source** is very simple: When programmers can read, redistribute, and modify the source code for a piece of software, the software evolves. People improve it, people adapt it, people fix bugs. And this can happen at a speed that, if one is used to the slow pace of conventional software development, seems astonishing."

from www.opensource.org
- ❖ Anyone can redistribute the software, even for a fee
- ❖ Source code must always be available

The power of open source: Greenstone uses ...

- ❖ **Ghostscript** **Interpreter for Adobe Postscript documents (Postscript plugin)**
- ❖ **Kea** **Keyphrase extraction program (to generate metadata)**
- ❖ **pdftohtml** **Converter for PDF documents (PDF plugin)**
- ❖ **rtftohtml** **Converter for RTF documents (RTF plugin)**
- ❖ **TextCat** **Detects languages and document encodings**
- ❖ **wvWare** **Converter for Word documents (Word plugin)**
- ❖ **Xlhtml** **Converter for Excel/Powerpoint documents (plugins)**
- ❖ **XML::Parser** **Parses XML documents, used to read and write Greenstone's internal XML document format**

and ...

- ❖ **MG** Creates compressed full-text indexes and performs searches
 - ❖ **GDBM** Database used for metadata etc
 - ❖ **wget** Downloading pages from the Web when creating collections
 - ❖ **YAZ** Client and server implementation of Z39.50
 - ❖ **Stemmer** English language stemmer
 - ❖ **Lucene** Alternative, incremental, full-text search engine
-
- ❖ **GCC** C/C++ compiler
 - ❖ **CVS** Version control system
 - ❖ **Perl** Used for plugins etc
 - ❖ **Apache** Web server used by many Greenstone installations

Humanity Development Library

for sustainable development and basic human needs

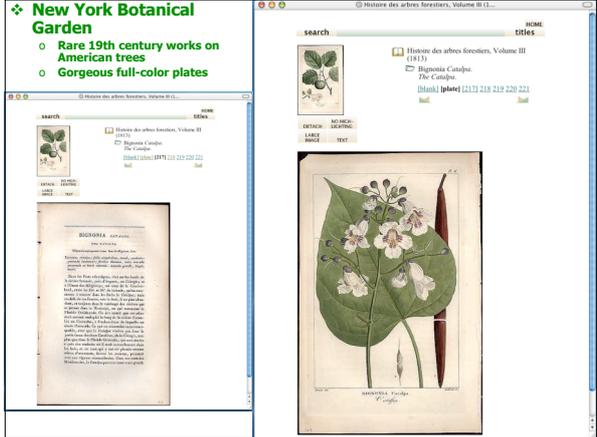

- ❖ 160,000 pages
- ❖ 30,000 images
- ❖ 800 books
- ❖ 430 magazines
- ❖ 340 kg
- ❖ US\$20,000
- ❖ CD-ROM
- ❖ US\$1
- ❖ Win3.1x upward
- ❖ Stand-alone
- ❖ and intranet server
- ❖ Web browser user interface

Global Help Project, Antwerp (+ UN agencies)

 Greenstone3

The Greenstone Librarian Interface (GLI)

- ❖ Building collections
- ❖ Interactive Java program
- ❖ Runs on anything
- ❖ Build a collection on the computer you are on
- ❖ ... plus new applet version
- ❖ Includes metadata editor

Caveat: cannot deal with such huge metadata collections as Greenstone can

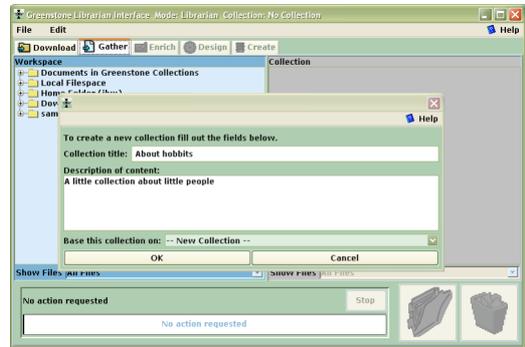

(Tutorial exercise: small collection of HTML files)

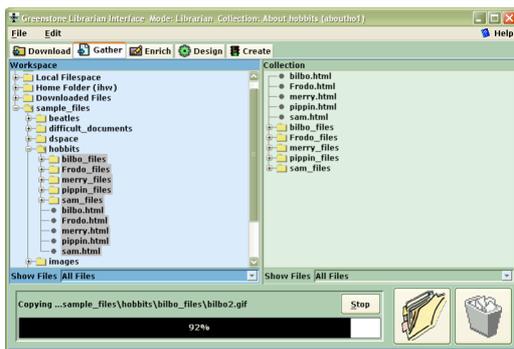

Invoke GLI: build a small collection of HTML files

- ❖ Gather
- ❖ Create
- ❖ Look at extracted metadata
- ❖ Set up shortcut in the Librarian interface

Create a new collection

Gather: Gather the files together

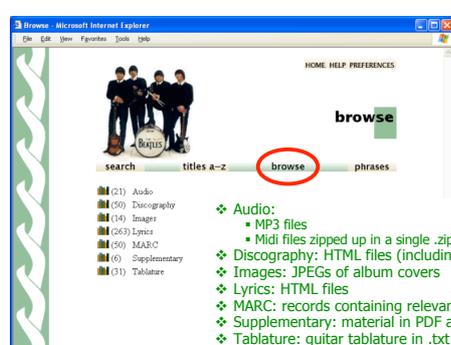

Create: Build the collection

Preview: admire the result

An example: Beatles collection

- ❖ Audio:
 - MP3 files
 - Midi files zipped up in a single .zip file
- ❖ Discography: HTML files (including many images)
- ❖ Images: JPEGs of album covers
- ❖ Lyrics: HTML files
- ❖ MARC: records containing relevant bibliographic records
- ❖ Supplementary: material in PDF and Word files
- ❖ Tablature: guitar tablature in .txt files

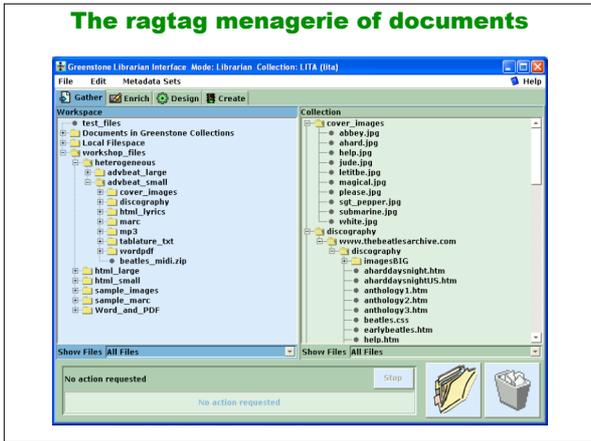

Building the Beatles collection

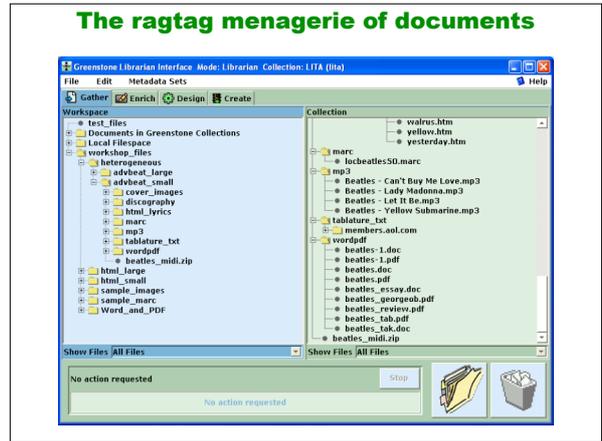

Gather: Gather the files together

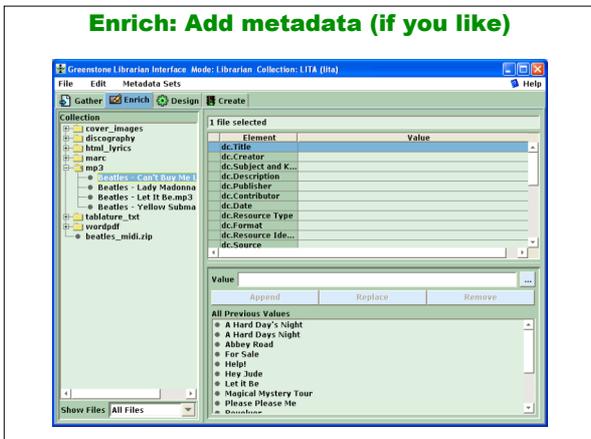

The ragtag menagerie of documents

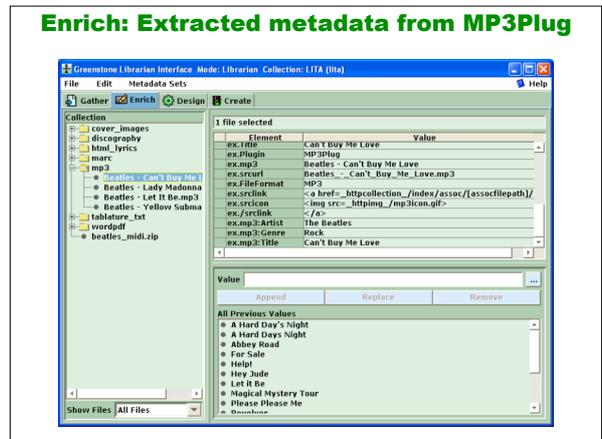

The ragtag menagerie of documents

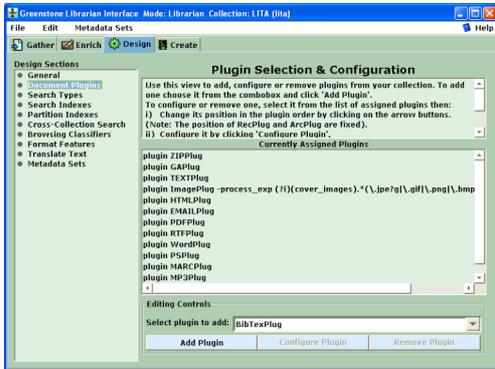

Enrich: Add metadata (if you like)

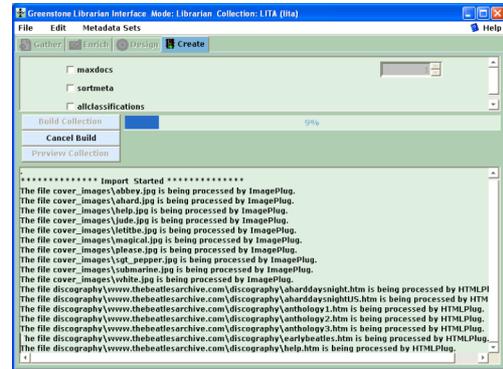

Enrich: Extracted metadata from MP3Plug

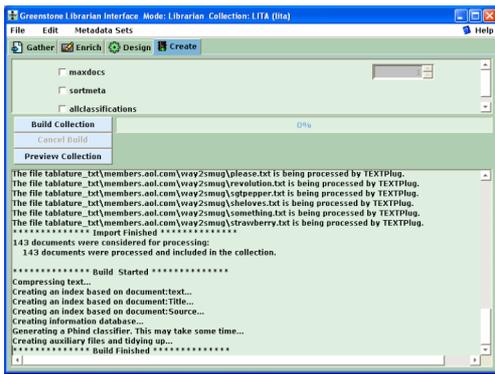

Design: Here are the plugins (and much more)

Create: Building the collection

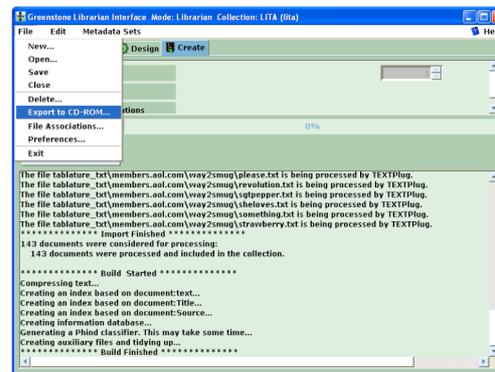

Create: It's built – preview it?

Previewing the collection

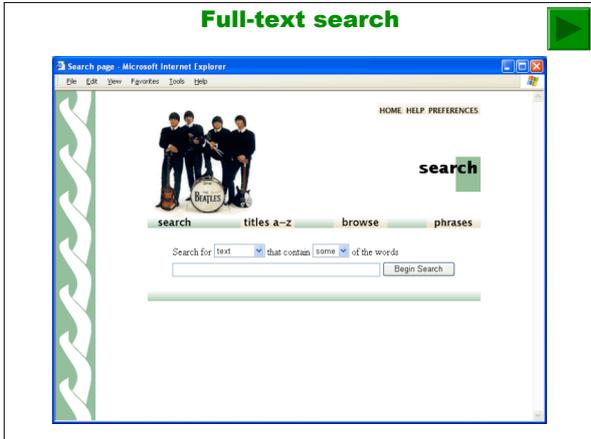

Export the collection to CD-ROM?

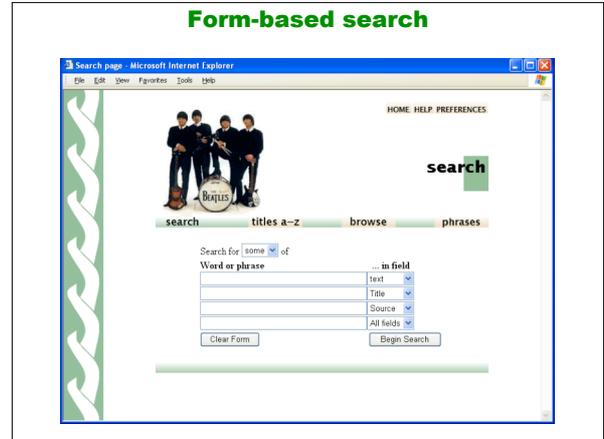

A (slightly) enhanced collection

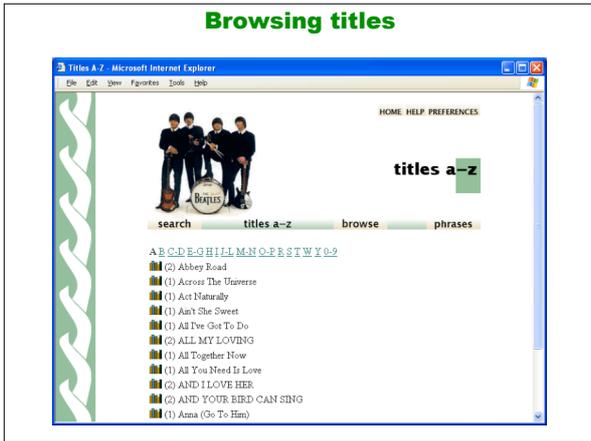

Full-text search

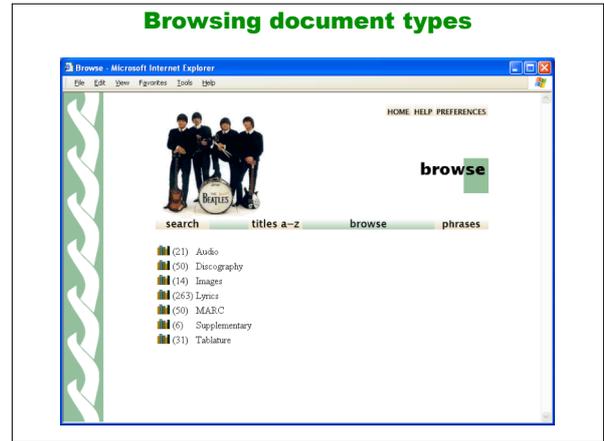

Form-based search

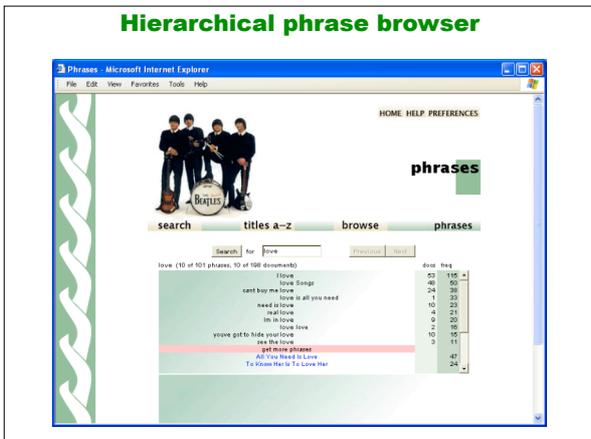

Browsing titles

Browsing document types

Hierarchical phrase browser

The workshop

Lab 3: Advanced collection configuration

- 3.1. Formatting the Word and PDF collection
- 3.2. Formatting the HTML collection—Tudor
- 3.3. Enhanced PDF handling
- 3.4. A bibliographic collection—Part B
- 3.5. Pointing to documents on the web
- 3.6. Section tagging for HTML documents
- 3.7. Exporting a collection to CD-ROM/DVD

Lab 4: Two examples: multimedia and scanned images

- 4.1. Looking at a multimedia collection
- 4.2. Building a multimedia collection
- 4.3. Scanned image collection
- 4.4. Advanced scanned image collection

Lab 5: Interoperability

- 5.1. Customization: macro files and stylesheets
- 5.2. Open Archives Initiative (OAI) collection
- 5.3. Downloading over OAI
- 5.4. Use METS as Greenstone's Internal Representation
- 5.5. Moving a collection from DSpace to Greenstone
- 5.6. Moving a collection from Greenstone to DSpace

News flashes

Getting stuff in

- ❖ New and flexible facilities for "paged images"
- ❖ Audio or video? Plugins for MP3, Ogg Vorbis, RealMedia
- ❖ Metadata? Plugins for MARC, CDS/ISIS, ProCite, BibTex, Refer, OAI
- ❖ Keep metadata as a single file or "explode" it into individual entries
- ❖ CDS/ISIS plugin (plus new, great documentation)
- ❖ Import your collection as METS, or from DSpace
- ❖ Plugin for the OpenDocument format

- ❖ LOM? Use the LOM plugin
- ❖ CONTENTdm? Use the CONTENTdm plugin
- ❖ Using the Download panel to interactively download from OAI, or Z39.50, or SRW
- ❖ Greenstone converts XML-based formats (OAI, METS) on the fly using XSLT (e.g. for Fedora)

Working on stuff

- ❖ Work on a remote collection with the Librarian applet
- ❖ There's also a Java Remote Building program for this
- ❖ Cross-collection searching ...

Getting stuff out

- ❖ Export your collection as METS, or for DSpace
- ❖ Serve it over OAI, or over Z39.50

Support for Institutional Repositories*

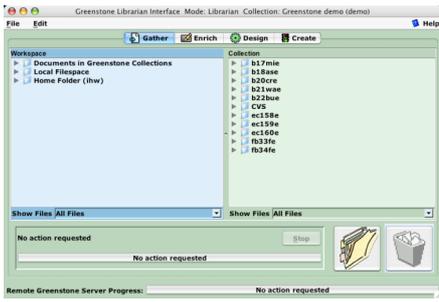

- ❖ Add documents to collections incrementally
- ❖ (Can use Lucene as its search engine instead of the old MG)
- ❖ DSpace-like web submission interface (with flexible workflows)

Future-proofing

- ❖ Greenstone3?
- It's coming, but everything is compatible
—and your readers will never notice the difference

News flash Applet version of GLI

- ❖ Collection on remote Greenstone server
- ❖ Edit it locally
 - gather
 - enrich
 - design
 - create
- ❖ Authentication
 - uses admin facility
- ❖ Locking

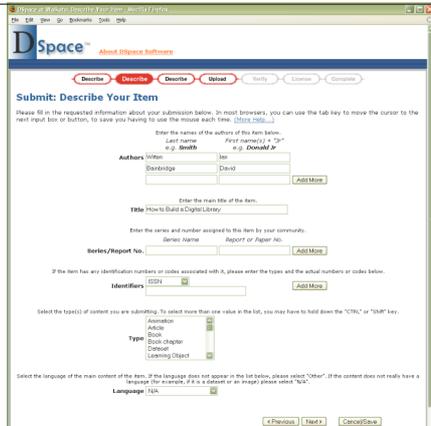

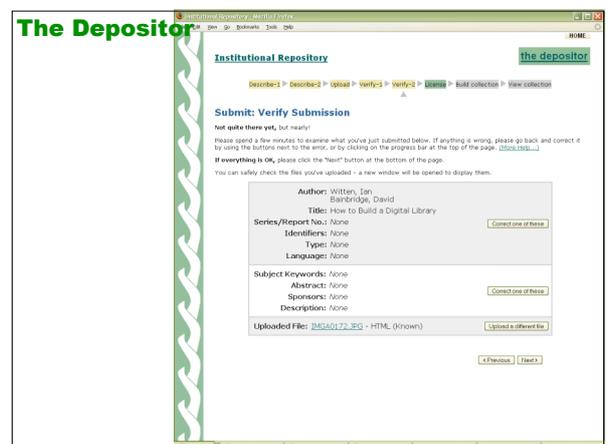

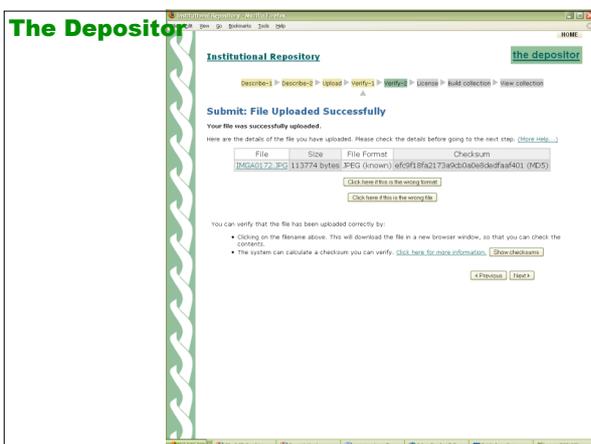

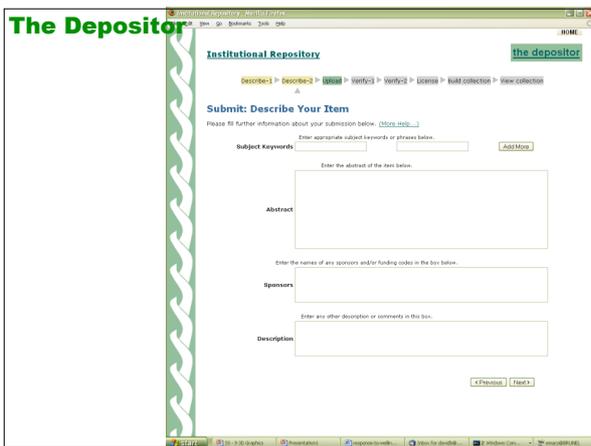

News flash CONTENTdm lookalike

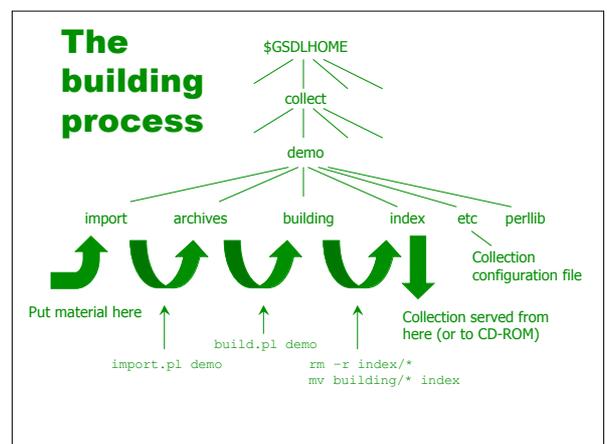

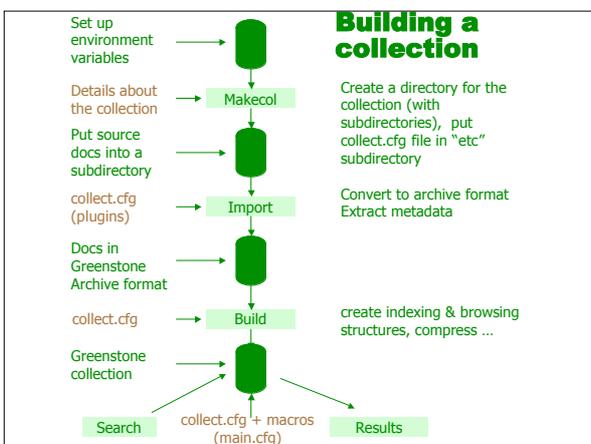

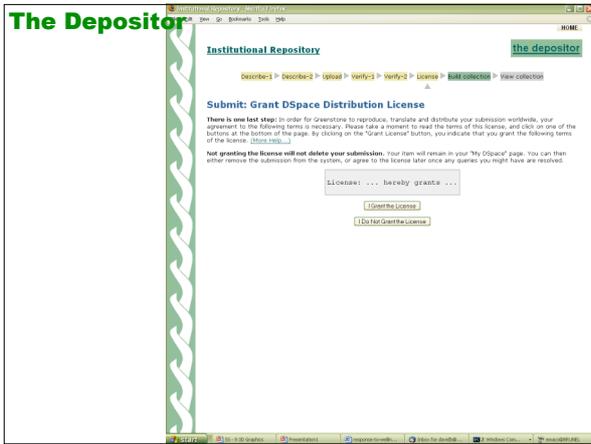

<http://puka.cs.waikato.ac.nz/cgi-bin/library?a=p&p=home&c=contentdm>

DSpace

The building process

```

Microsoft Windows [Version 5.00.2195]
(C) Copyright 1985-2000 Microsoft Corp.

C:\> cd "C:\Program files\gsdl"

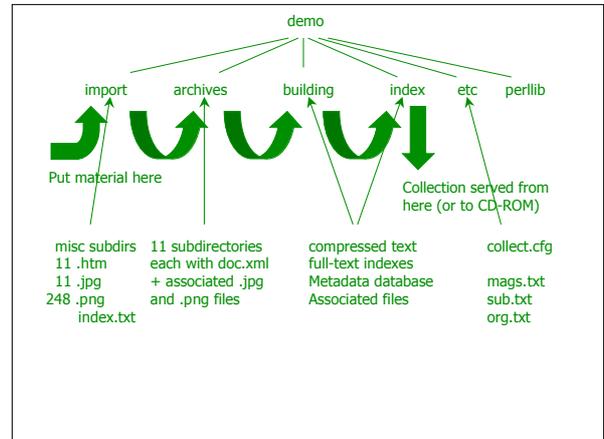

C:\Program files\gsdl> setup

C:\Program files\gsdl> perl -S mkcol.pl
    -creator me@here colname

Copy source into collect\colname\import
C:\> perl -S import.pl -removeold colname

C:\> perl -S buildcol.pl colname

Rename the "building" directory to "index"
    
```

Agenda

- Overview**
 - What does Greenstone do?
 - Greenstone facts; standards
 - Reader's Interface: examples of collections
- Librarian interface**
 - Build a collection in 30 sec (Hobbits)
 - Build a multimedia collection (Beatles)
 - Adding and using metadata
 - Browsing classifiers, search indexes
 - Building a collection manually (for masochists only)
- Advanced stuff**
 - Under the hood: collection configuration file
 - Customizing with macros
 - Personalizing your home page
 - Different interface languages
 - Examples of what others have done
- Reaching out**
 - Serving and acquiring OAI
 - DSpace and METS
 - Greenstone3

Under the hood: Collection configuration file

- ❖ name, icon, etc
- ❖ description
- ❖ email of creator
- ❖ search indexes
- ❖ plugins
- ❖ classifiers

```

creator          sjboddie@cs.waikato.ac.nz
maintainer       sjboddie@cs.waikato.ac.nz
public           true
beta             true

indexes          section:text section:Title document:text
defaultindex    section:text

plugin           GAPlug
plugin           ArcPlug
plugin           PdfPlug

classify         Hierarchy -hfile sub.txt -metadata Subject -sort Title
classify         SOLList -metadata Title
classify         Hierarchy -hfile org.txt -metadata Organization -sort Title
classify         List -metadata Howto

format           SearchWList "<td valign=top>[[link]][icon]/[[link]]</td>
                    <td>[[parent(All): ')]Title],[parent(All): ')]Title]: )
                    [[link]][Title]/[[link]]</td>"
format           CLAVList  "<tr>[[link]][Howto]/[[link]"
format           DocumentImages true
format           DocumentText "<h3>[[Title]]</h3>[[\n]]<pre>[[Text]]"

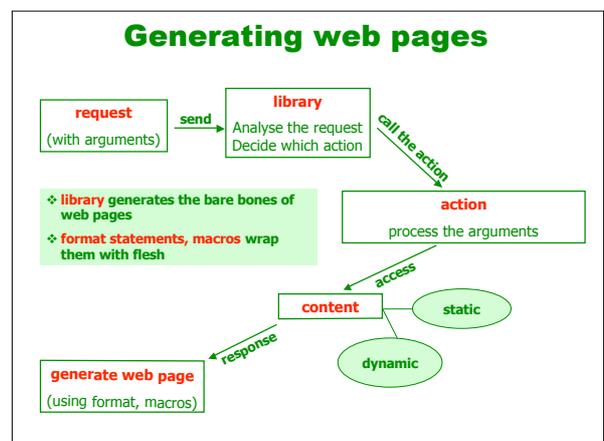

collectionmeta  collectionname "greenstone demo"
collectionmeta  collectionextra "This is a demonstration collection for the
                    Greenstone digital library software.\nIt contains a small
                    subset (11 books) of the Humanity Development Library"
collectionmeta  iconcollectionmall "/gsdl/collect/demo/images/demo.gif"
collectionmeta  iconcollection "/gsdl/collect/demo/images/demo.gif"
collectionmeta  .section:Title "section titles"
collectionmeta  .document:text "entire books"
collectionmeta  .section:text "chapters"
    
```

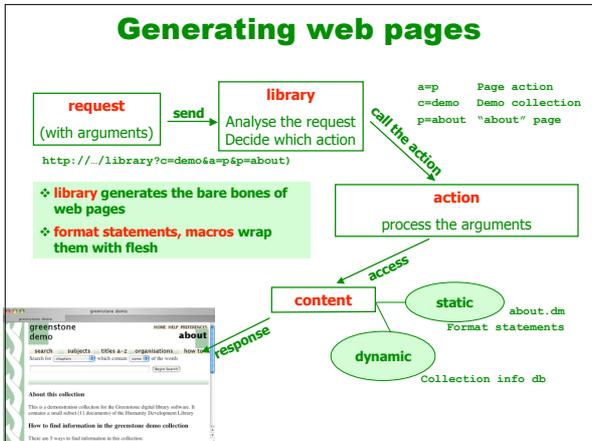

- ❖ documents
- ❖ query results
- ❖ classifiers

Alter configuration

- ❖ Add full-text index of titles
- ❖ ... or authors
- ❖ Add alphabetic author browser
- ❖ Include Word documents
- ❖ Include PDF documents
- ❖ Separate index for each language
- ❖ Extract acronyms and add list
- ❖ Import OAI metadata
- ❖ Extract phrase hierarchy and add browser
- ❖ Alter the format of any of the above
- ❖ Restrict collection's interface langs
- ❖ Change default interface language

indexes	document:Title
indexes	document:Creator
classify	AZList -metadata Creator
plugin	WordPlug
plugin	PDFPlug
languages	en fr es
plugin	PDFPlug -extract_acronyms
plugin	OAIPlug
classify	Phind
format ...	
format	PreferenceLangs en fr es
cgiarg	shortcode=1 argdefault =fr

Customizing with macros

- let you customize presentation
- present pages in different languages
- print variables into the page text (e.g. number of search hits)

❖ **Macro files**

- stored in `gsdl/macros` folder
- each file defines one or more "packages" (A "package" is a group of macros)
- loaded on startup (note difference between Local and Web Library)
- listed in `etc/main.cfg`

❖ **Collection-specific macros**

- Stored in `gsdl/collect/mycol/macros/extra.dm`
- Or include argument `[c=collectionname]` for each macro

Personalizing your home page

`C:\Program Files\gsdl\etc\main.cfg` change `home.dm` to `yourhome.dm`

yourhome.dm

```

package home
_content {
  <h2> Your own Greenstone home page</h2>
  <ul>
  <table>
  <tr valign=top><td>Search page for the demo collection<br></td>
  <td><a href="httpquery_d=c=demo">Click here</a></td></tr>
  <tr><td>"About" page for the demo collection</td>
  <td><a href="httppageabout_c=demo">Click here</a></td></tr>
  <tr><td>Preferences page for the demo collection</td>
  <td><a href="httppagepref_c=demo">Click here</a></td></tr>
  <tr><td>Home pages</td>
  <td><a href="httppagehome_">Click here</a></td></tr>
  <tr><td>Help pages</td>
  <td><a href="httppagehelp_">Click here</a></td></tr>
  <tr><td>Administration page</td>
  <td><a href="httppagestatus_">Click here</a></td></tr>
  <tr><td>The Collector</td>
  <td><a href="httppagecollector_">Click here</a></td></tr>
  </table>
  </ul>
}
    
```

Macros used in home.dm

<code>_httppagehome_</code>	name of the home page
<code>_httppagehelp_</code>	... the help page
<code>_httppagestatus_</code>	... the administration page
<code>_httppagecollector_</code>	... the Collector page
<code>_httpquery_&c=demo</code>	search page for the demo collection
<code>_httppageabout_&c=demo</code>	about page for the demo collection
<code>_httppagepref_&c=demo</code>	preferences page for the demo collection
<code>_content_{ ... }</code>	defines a macro called <code>_content_</code> contains HTML, but <code>{</code> , <code>}</code> , <code>\</code> , and <code>'</code> must be escaped with a backslash
<code>_header_{ ... }</code>	HTML page header (contains squigly bar)
<code>_footer_{ ... }</code>	HTML page footer

`main.cfg` contains list of macros, replace `home.dm` by `yourhome.dm` and put it in the `macros` directory

about.dm

```

package about
#####
# about page content
#####
pagetitle {_collectionname_}
_content {
  <center>
  <navigationbar_
  </center>
  <p>_query:queryform_
  <p>_iconblankbar_
  <p>_textabout_
  <textsubcollections_
  <h3>_help:textsimplehelpheading_</h3>
  <h3>_help:simplehelp_
}
  <textabout_ {
  <h3>_textabcol_</h3>
  <Global:collectionextra_
}
    
```

❖ can contain conditional statements

- `_if_ ...`

❖ can take arguments

- `a=p, l=d` etc.

Annotations in the code block:

- `pagetitle {_collectionname_}`: Macro names begin and end with underscore
- `<center>`: Content defined in curly brackets
- `<p>_textabout_`: Content is plain text, HTML, other macros, Javascript, applet links

Customization hints

- ❖ To change the look and feel of Greenstone
 - edit the *base* and *style* packages
- ❖ To change the query page
 - edit *query.dm*
- ❖ To change the Preferences page
 - edit *pref.dm*

Different interface languages

The Greenstone documentation wiki

❖ go to greenstone.org

The Greenstone OAI server

❖ Runs as a CGI program called *oaiserver*

– Greenstone installation

`http://.../cgi-bin/gsd1`

– OAI server

`http://.../cgi-bin/oaiserver?verb=Identify`

`http://.../cgi-bin/oaiserver?verb=ListSets`

`http://.../cgi-bin/oaiserver?verb=ListIdentifiers&set=xxx`

`http://.../cgi-bin/oaiserver?verb=ListIdentifiers&set=xxx&metadataPrefix=oai_dc`

`http://.../cgi-bin/oaiserver?verb=ListRecords&set=xxx&metadataPrefix=oai_dc`

`http://.../cgi-bin/oaiserver?verb=GetRecordIdentifier=xxx&metadataPrefix=oai_dc`

OAI 1.1

OAI 2.0

❖ Requires a full webserver (not "local library" version)

❖ Configuration file: `etc/oai.cfg` in the Greenstone filespace

– repository name and version (OAI 1.1 or 2.0)

– collections to be made accessible to OAI clients

– metadata mapping file into DC (server only supports DC)

Acquiring web documents

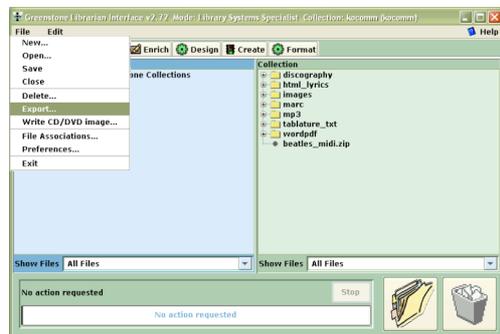

Acquiring OAI metadata + docs

Acquiring Z39.50/SRW metadata

Exporting a collection

Exporting as DSpace, METS ...

MODS: XSLT mapping

MODS mapping into Greenstone using XSLT (specify as argument to OAIPlug):

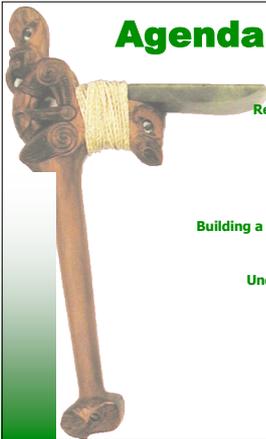

```

...
<xsl:template match="mods:topic">
  <dc:Subject><xsl:value-of select="." /></dc:Subject>
</xsl:template>

<xsl:template match="mods:titleInfo">
  <dc>Title>
    <xsl:value-of select="mods:title" />
    <xsl:if test="mods:subTitle">
      <xsl:text> </xsl:text>
      <xsl:value-of select="mods:subTitle" />
    </xsl:if>
  </dc>Title>
</xsl:template>
...

```

Greenstone3

Greenstone 3

Greenstone 2 was designed about 7 years ago. Since then, new software and library standards have emerged ...

- ❖ **Easier to modify interface: generates data (XML) rather than presentation (HTML)**
 - XML can be transformed using XSLT, rather than HTML via macro files
- ❖ **More dynamic: more can be done at runtime**
 - e.g. sort search results on the fly, generate new classifiers at runtime
- ❖ **METS foundation: multiple hierarchies possible**
 - e.g. chapter-section-subsection hierarchy can coexist with page header-contents-footer hierarchy
- ❖ **Distributed modules, using SOAP**
 - interface can be on different computer to collection, can talk to several different Greenstone sites
- ❖ **Java basis: platform independent**
 - Greenstone2 operates on different platforms, but at a high cost to implementors
- ❖ **Better software technology**
 - easier for people (e.g. our students!) to modify the software to make it do radically different things
